Listing of Claims:

1-12. (Cancelled)

13. (Currently amended) A method of preparing a yeast composition, comprising culturing a plurality of yeast cells of Saccharomyces cerevisiae Hansen AS2.502 in the presence of an alternating electric field having a frequency in the range of about 7900 to 13200 MHz and a field strength in the range of about 240 to 500 mV/cm for a period of time sufficient to substantially increase the capability of said plurality of yeast cells to treat male sexual disorder in a mammal as compared to yeast cells not having been so cultured 60-168 hours.

14. (New) The method of claim 13, wherein said frequency is in the range of about 7900-8000, 12700-12800, or 13050-13200 MHz.

15. (New) The method of claim 13, wherein said field strength is in the range of about 260-280, 290-320, 300-320, 310-340, 330-360, 350-380, 360-400, or 420-460 mV/cm.

16. (New) The method of claim 13, wherein said composition is in the form of a tablet, powder, or a health drink.

17. (New) The method of claim 13, wherein said composition is in the form of a health drink.
